Appropriate Use of Earnings Forecasts and Other Important Information

This document contains projections and other forward-looking statements based on information available to the Company as of the date of this document. Actual results may differ from those expressed or implied by forward-looking statements due to various factors. For the assumptions underlying the forecasts herein and other information on the use of earnings forecasts, refer to "1. Analysis of Operating Results and Financial Condition (4) Consolidated Earnings Forecast" on page 9.

1. Analysis of Operating Results and Financial Condition

(1) Operating Results

In the first nine months of 2022 (January 1 to September 30, 2022), the Group had been affected by the spread of COVID-19 in Japan and overseas since the beginning of the year. However, the lifting of restrictions on behavior after April led to year-on-year increases in Group ontrade beer sales and the sales of beer halls and other dining-out establishments. On the other hand, the outlook remains uncertain, with concerns over rising prices due to factors such as the situation in Ukraine, the rapid depreciation of the yen, and surging prices of raw materials will lead to consumers becoming more cautious with their spending.

In this context, despite a decrease in revenue from the Food & Soft Drinks and Real Estate businesses, overall consolidated revenue increased year-on-year. This was thanks to an increased revenue from the Alcoholic Beverages business due to factors such as a recovery in demand for on-trade market, an increasingly weak yen, and strong sales volumes in the United States.

Overall consolidated core operating profits increased year-on-year, despite decreased profits from the Real Estate business. This was thanks to the contribution of the Alcoholic Beverages business to increased revenue, etc., and the contribution of the Food & Soft Drinks business to profit structure improvements.

1) Summary in key figures (Q3)

^{*}Core operating profit is the Sapporo Group's unique profit benchmark for measuring the performance of its regular business and is calculated by deducting cost of sales, and selling, general and administrative expenses, from revenue.

Results by segment are outlined below.

Alcoholic Beverages

Revenue increased year-on-year thanks to factors such as the recovery of the on-trade market and strong off-trade market sales in the United States.

Core operating profit and operating profit both increased year-on-year, despite increased variable costs due to factors such as increased raw material prices. This was thanks to the effects of increased revenue as well as the effects of profit structure improvements of the Restaurants business.

- Revenue: ¥241.0 billion (up ¥38.9 billion, or 19.3% year on year)
- Core operating profit: ¥4.9 billion (compared with a profit of ¥0.0 billion a year earlier)
- Operating profit: ¥6.8 billion (compared with a loss of ¥0.2 billion a year earlier)

Details of Alcoholic Beverages (Japan and Overseas) and Restaurants in the Alcoholic Beverages business were as follows.

Japan

On-trade market demand temporarily declined due to the rapid increase of infected individuals during the seventh wave of COVID-19. However, the impact on establishments that serve alcohol was milder than that of restrictions on the serving of alcohol during declarations of state of emergency, etc. last year. In addition, due in part to increased demand ahead of

price revisions, total domestic demand for beer and beer-type beverages was estimated to have been about 109% year-on-year.

In this context, the Group's total domestic sales volumes of beer and beer-like beverages was 111% year-on-year. This was thanks to an increase in sales volume of on-trade products and an increase in sales of off-trade products due to last-minute demand ahead of price revisions.

Overseas

COVID countermeasures promoted economic resumption and commercial market demand was in recovery mode over the previous year, but in overall North American beer demand both the U.S. and Canada posted year-on-year declines.

In this context, sales of overseas beer brands exceeded that of the previous year thanks to a recovery of the on-trade market in Canada.

Sales of RTDs*, something we are focusing on, are trending above those of the same period last year. In addition, sales of Sapporo brand beer remained strong thanks to the recovery of the on-trade market in the United States, the success of strengthening efforts in the off-trade market, and other factors.

Further, the Group acquired Stone Brewing Co., LLC (Hereinafter, Stone) and made it a consolidated subsidiary at the end of August. This was done for a number of purposes. One was to secure a manufacturing base for further growing the Sapporo brand beer, particularly in the United States. Another was to expand our Beer business by acquiring new brands.

Restaurants

Demand remains unstable in the pub, restaurant, and izakaya industry due to the impact of COVID-19. However, our Restaurants business has shifted to a gradual recovery since the lifting of operating restrictions in April, though additional waves of COVID-19 and other factors do lead to demand fluctuations.

*: RTD, or ready-to-drink beverages, are pre-mixed, low-alcohol cocktail-like beverages that can be consumed as is immediately after opening.

Food & Soft Drinks

Revenue decreased year-on-year due to factors such as decreased sales due to the reduction of unprofitable vending machines and the sell-off of the Cafe business in April.

Core operating profit and operating profit both increased year-on-year, despite increased raw material costs. This was thanks to the contribution of improved profits due to profit structure improvements such as the reduction of unprofitable vending machines and the sell-off of the Cafe business.

- Revenue: ¥89.5 billion (down ¥0.9 billion, or 1.0% year on year)
- Core operating profit: ¥0.8 billion (compared with a loss of ¥0.3 billion a year earlier)
- Operating profit: ¥1.3 billion (compared with a loss of ¥0.0 billion a year earlier)

Although COVID continues to have an impact, the on-trade market and vending machine demand recovered thanks to the relaxation of restrictions, with total domestic beverage demand estimated to be around 109% that of the previous year.

In this context, while lemon beverages trended well thanks to consumers' heightened health consciousness, domestic beverage sales volume decreased due to the reduction of unprofitable vending machines, falling to 99% of the previous year.

As for overseas, domestic revenue in Singapore increased to 104% year-on-year due to the loosening of the country's COVID-19 pandemic restrictions. Exports out of Singapore have also remained strong, growing to 128% year-on-year.

Furthermore, in April, we transferred all shares of Pokka Create Co., which operates the Cafe de Crie coffee shop chain, to focus management resources on growth areas, particularly the growing lemon business.

Real Estate

Revenue decreased year-on-year due to a number of factors, such as the sale of Ebisu First Square last June, as well as the renovation of the Center Plaza at Yebisu Garden Place ahead of its reopening this November.

Core operating profit decreased year-on-year due to the decrease in revenue.

Operating profit decreased year-on-year in reaction to the gain on sale of investment properties in the previous year, among other factors.

- ■Revenue: ¥15.2 billion (down ¥1.3 billion, or 7.8% year on year)
- Core operating profit: ¥4.8 billion (down ¥1.6 billion, or 24.6% year on year)
- Operating profit: ¥4.1 billion (down ¥24.4 billion, or 85.5% year on year)

The office leasing market in the Greater Tokyo area has yet to see a recovery in occupancy rates and average rent levels since the beginning of the year.

In this context, the Group's Real Estate business saw the office occupancy ratio of its large multi-purpose complex, Yebisu Garden Place, decline due to deteriorating market conditions, repairs and upgrades of its HVAC system, and other factors.

(2) Consolidated Financial Condition

As of the end of this Q3 consolidated accounting period, the following were the change factors in the condition of assets, liabilities and equity.

(Millions of yen)

| Category | As of December 31, 2021 | As of September 30, 2022 | Change |
|------------------------------|-------------------------|--------------------------|---------|
| Current assets | 167,806 | 166,247 | (1,559) |
| Non-current assets | 426,745 | 473,758 | 47,013 |
| Total assets | 594,551 | 640,004 | 45,453 |
| Current Liabilities | 210,535 | 218,453 | 7,918 |
| Non-current liabilities | 220,688 | 247,419 | 26,731 |
| Total liabilities | 431,224 | 465,872 | 34,649 |
| Total equity | 163,327 | 174,132 | 10,805 |
| Total liabilities and equity | 594,551 | 640,004 | 45,453 |

At the end of Q3, assets increased by ¥45.5 billion relative to the previous fiscal year-end to ¥640 billion. This was due in part to the increase of assets including goodwill, property, plant and equipment due to the acquisition of Stone. It was despite a decrease in assets including assets held for sale due to the sale of a consolidated subsidiary, and trade and other receivables due to the fact that the end of the previous fiscal year was a holiday.

On the same comparative basis, liabilities increased by ¥34.6 billion to ¥465.9 billion. This was due in part to an increase in liabilities such as bonds and borrowings (current) and other financial liabilities (non-current). It was despite a decrease in liabilities including other current liabilities due in part to the fact that the end of the previous fiscal year was a holiday.

On the same comparative basis, equity increased by ¥10.8 billion to ¥174.1 billion. This was due to an increase in other components of equity due to changes in exchange rates, as well as an increase in retained earnings due to the posting of profit attributable to owners of parent. It was despite the payment of year-end dividends.

(3) Consolidated Cash Flows

At end-Q3, cash and cash equivalents (hereinafter "cash") increased by ¥2.1 billion (12%) to ¥19.5 billion, relative to the previous consolidated fiscal year-end.

Consolidated cash flows for the first nine months of 2022, and the main factors affecting those flows were as follows.

(Millions of yen)

| Category | As of September 30, 2021 | As of September 30, 2022 | Change |
|---|--------------------------|--------------------------|----------|
| Cash flows from operating activities | 26,931 | 13,457 | (13,474) |
| Cash flows from investing activities | 17,652 | (41,942) | (59,594) |
| Free cash flow | 44,583 | (28,485) | (73,068) |
| Cash flows from financing activities | (51,525) | 30,752 | 82,277 |
| Effect of exchange rate change on cash and cash equivalents | 498 | (168) | (667) |
| Net increase (decrease) in cash and cash equivalents | (6,444) | 2,099 | 8,542 |
| Cash and cash equivalents at beginning of period | 19,734 | 17,368 | (2,366) |
| Cash and cash equivalents at end of period | 13,290 | 19,467 | 6,177 |

(Cash flows from operating activities)

Operating activities provided net cash amounting to ¥13.5 billion (down ¥13.5 billion, or 50% year on year). This was mainly due to the positive factors of a ¥15.6 billion decrease in depreciation and amortization, ¥12.9 billion in trade and other receivables, and ¥9.0 billion in profit before tax, which offset negative factors of a ¥10.2 billion decrease in income taxes paid, ¥9.8 billion in accrued alcohol tax, and ¥5.5 billion in increase or decrease in retirement benefit asset or liability.

(Cash flows from investing activities)

Cash used in investing activities was ± 41.9 billion (compared to ± 17.7 billion provided in the previous fiscal year). Although there was proceeds from sale of property, plant and equipment of ± 2.8 billion, the decline was due to payments for acquisition of subsidiaries of ± 22.6 billion, purchase of investment property of ± 11.6 billion, and purchase of property, plant and equipment of ± 6.3 billion.

(Cash flows from financing activities)

Cash provided by financial activities was ¥30.8 billion (compared to ¥51.5 used in the previous fiscal year). The main inflows were ¥40.0 billion in proceeds from long-term borrowings, which outweighed ¥14.0 billion for repayment of long-term borrowings.

(4) Consolidated Earnings Forecast

[Consolidated Earnings Forecast]

The consolidated earnings forecast for the full fiscal year to December 31, 2022, is unchanged from the forecast announced by the Company on February 10, 2022.

[Medium-Term Management Plan]

The Group's Board of Directors, at a meeting held on November 9, 2022, decided on a four-year "Medium-Term Management Plan (2023-2026)" starting from the beginning of the fiscal year 2023. In our Medium-Term Management Plan, we sort forth a basic policy of "Beyond150 - New Growth Through Business Structure Transformation -" and we will decisively implement structural reforms based on a reorganization of our business portfolio, aiming to realize growth of our overseas and core businesses.

Aiming to improve our cash ability to generate cash in line with growth and returns in excess of the cost of capital, we have set financial targets and indicators of a return on equity (ROE) ratio of 8%, an average annual EBITDA growth rate of approximately 10%, and an average annual overseas sales growth rate of approximately 10%.

Further, when developing the Medium-Term Management Plan, we completely revised our key sustainability issues in response to changes in the social conditions and business environment surrounding the Group. We will set new goals for each of issue and promote efforts to achieve them while monitoring the progress of these efforts.
